indicate that the 321st Arty Ron Bn and the unidentified signal battalion of the IV Arty Corps had left the installation for exercises in the northern portion of Letzling Heath on 4 May. Upon completion of the exercises on 13 May, these units possibly returned and transferred to Altengrabow. The present report tends to indicate that in late May only the headquarters of the artillery corps was left in the installation. It is believed possible that officers courses for officers of the artillery corps were held in the Kraftfahrer haserne. On 31 May, elements of the 25th RL Brig were loaded probably for firing practices at a troop training grounds.
